A new release by Sinevibes. Boosting a familiar Name reminiscent of their older collections: Planet V is a sound expansion library for Roland Fantom-S and Fantom-X series.

This sound bank has been created using Roland's V-Synth GT synthesizer, and it lays their sonic ability into the high-polyphony sound engine of the Fantoms.

Included are synthesizers, bells, electric pianos, basses, vocals and choirs, pads and atmospheres, pulsating and rhythmically-modulated sounds, drum and percussion kits, sound effects, vocoder voices, beat loops, one-key arrangements and even more.

Features:

- 942 samples (110 MB)
- 64 multisamples
- 140 patches
- 14 rhythm kits

Planet V can be purchased for \$49, shipped immediately as a download or on a CD. There is also a Fantom Mega Pack bundle available for \$79 and includes Planet V, Planet X, Planet F libraries as well as the Fantom TweakBook.
