Unique Ways to Use an iPhone as a Music Sequencer

Here are some Nice ideas on how to use your iPhone not only for entertainment and business but also for music composition.

By using supercollider and an iPhone, tn800 recreates some classic electronic pop

Here, masayukiakamatsu demos using aniPhone to control Max-MSP

This is a demo of how cappelnord uses an iPhone step sequencer, based upon the Monome 40h Controller

Another interesting iPhone music experiment is BeatPhone

More and more iPhone electronic music applications are under development by iPhone developers around the world. Another notable is iPhone Synth. It is not ready yet and is in the alpha stage of production.
